SHUBHAM DIXIT

Senior Software Engineer

shubhamdixit5314@gmail.com +918827708602 Indore, India LinkedIn

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 9 years of experience designing and deploying scalable, high-performance web applications. Expertise in JavaScript, TypeScript, React.js, Next.js, Node.js, and cloud-based architectures. Proven track record building complex, multi-app platforms (marketplaces, fintech, notarization) with event-driven backend workflows and integrated third-party service layers. Adept at collaborating in distributed teams, leading Agile/SCRUM delivery, and mentoring developers. Additionally skilled in Web3 development, integrating blockchain networks, smart contracts, wallets, and tokens for decentralized applications (dApps).

TECHNICAL SKILLS

Languages
JavaScript, TypeScript, HTML5, CSS3

Backend
Node.js, Express.js, Hapi.js, NestJS, gRPC, REST API, WebSockets, Trigger.dev

Blockchain/Web3
Smart Contracts, Solidity, Web3.js, Ethers.js, MetaMask, IPFS

Testing
Jest, Mocha, Chai, React Testing Library, Enzyme, Cypress

Project Management
Jira, Trello, Agile, SCRUM

Frontend
React.js, Next.js, Redux, Redux-Saga, Tailwind CSS, Material UI, Bootstrap, Formik

Databases
PostgreSQL, MongoDB, Mongoose, Sequelize, Redis

Platform/Integrations
HubSpot, Stripe, PandaDoc, Clerk, Twilio, Resend, SendGrid, Meilisearch

Tools & Platforms
Git, Docker, AWS, Kafka, Socket.IO, PM2, Swagger, Postman, Turborepo, pnpm

UI/UX & Dev Tools
Figma, Sketch, Webpack, Babel, Adobe XD, VS Code, Storybook

PROFESSIONAL EXPERIENCE

Lead Full Stack Developer 2022 – Present | Indore
Hotbit InfoSoft

- Developed reusable TypeScript utilities, shared API clients, and validation patterns to reduce duplicated logic and maintain consistent behavior across multiple applications.
- Collaborated with product managers, designers, and backend engineers to translate business requirements into maintainable features across campaign management, creator onboarding, and contract workflows.
- Improved application reliability by handling API errors, asynchronous state transitions, and edge cases across complex multi-step business processes.
- Participated in code reviews, technical discussions, and iterative delivery to maintain code quality and support scalable development across the monorepo.

Senior Frontend Engineer 2019 – 2022 | Saudi Arabia
BOYSENBERRY

- Optimized frontend rendering and data-fetching strategies using Next.js Server Components and client-side caching to improve responsiveness and reduce unnecessary network requests.
- Implemented reusable form components, typed API integrations, and consistent error-handling patterns to simplify development across member-facing and administrative workflows.
- Strengthened application accessibility and responsive behavior through reusable UI primitives, semantic markup, and consistent design-system conventions.
- Collaborated with backend engineers to define API contracts, troubleshoot integration issues, and maintain consistency between frontend validation and backend business rules.

Frontend Engineer 05/2017 – 12/2019 | Remote
Confidential
- Developed reusable React components and TypeScript-based frontend modules, improving maintainability and consistency across client projects.
- Integrated REST APIs and real-time communication features to support interactive workflows and timely updates across web applications.
- Investigated production issues, fixed UI defects, and optimized component rendering to improve application stability and user experience.
- Worked with cross-functional and distributed teams to clarify requirements, estimate development tasks, and deliver features within project timelines.

PROJECTS

Credit Card Risk Profiler
- Developed a fintech dashboard for a UAE-based startup, improving data analytics and user engagement.
- Led frontend development, converting Envision designs into Figma-based UI.
- Implemented RESTful APIs, authentication (JWT, PassportJS), and WebSocket communication.

Tech Stack: React, Redux Toolkit, Material UI, NestJS, Docker, AWS, MongoDB, Redis.

Cost Estimator
- Migrated a legacy jQuery-based frontend to React.js, improving efficiency.
- Enhanced performance with bundle splitting, caching, and API optimizations.
- Integrated AWS S3 for document storage.

Tech Stack: React, TypeScript, PostgreSQL, Express.js, Redis, Kafka, AWS S3.

Notarization Platform
- Developed a remote document notarization platform with role-based access.
- Integrated Stripe for payments and Veriff for identity verification.

Tech Stack: React, TypeScript, Redux Toolkit, TurboRepo, React Query, Material UI.

Web3 Marketplace
- Built a decentralized NFT marketplace, integrating Web3 wallets for transactions.
- Developed smart contracts on Ethereum and Binance Smart Chain (BSC).
- Used IPFS for decentralized storage, optimizing gas fees.

Tech Stack: React, TypeScript, Solidity, Web3.js, Ethers.js, Hardhat, IPFS, MetaMask.

EDUCATION

Bachelor's in Computer Science 2013 – 2017 | Indore, India
IET, DAVV
